Forecast for Friday 30 Jul 2021

Weather: Poor visibility across all ranges through the day but there is scope for an improvement across Skye and southwards from Torridon through morning and early afternoon, perhaps with some sunshine. Thicker cloud across the northern ranges will sink south through evening bringing some patchy drizzle.

Chance of cloud free mountain/hill tops above 800m: 50% across Skye and Torridon southwards from mid morning to mid afternoon, otherwise very little chance.

Visibility: Cloud will be extensive above 400-600m but will lift and break through morning across the southern ranges, but to an uncertain extent. Cloud will lead visibility to be reduced to a kilometre or less, but no issues on lower slopes.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Best conditions expected across the south, but be prepared for poor visibility on the hills.

Forecast for Saturday 31 Jul 2021
Weather: A brighter day compared to Friday as areas of cloud lift and break more reliably to bring generally dry conditions with good visibility and spells of sunshine. The odd shower is possible across the north and along the west coast.

Maximum wind: North 5-15mph.

Chance of cloud free mountain/hill tops above 800m: 30% improving 90%.

Visibility: Areas of cloud above 600-800m will lift and break through morning with only patches remaining above munro level. Any passing showers will do little to affect visibility so some distant views should be on offer.

Temperature: **Glens:** 10C rising to 13-15.
At 800m: 5-7C.
Freezing level: Well above summits.
